

Pricing Structure for Deep Learning TSA Maths Training (Valid from September 2017)

At Deep Learning TSA we provide a number of different options for schools wishing to access training on mastery approaches to mathematics teaching.

(A) Basic model:

Teachers access three core training days.

(B) Basic plus follow-up:

In addition to three core training days a specialist provides classroom based coaching sessions to develop practice. Core training is discounted in this model to promote uptake of follow up which leads to effective implementation.

(C) Cluster package:

As B above, plus afternoon coaching sessions. This is the most effective model and requires schools to form a cluster of a minimum of six schools who receive the training together.

Basic model training prices for core training

- 3 training days - £390 per delegate
- Classroom based mentoring sessions - £250 per morning / £400 per day (we recommend these if you are new to the approach – for more information just e-mail deeplearningtsa@gmail.com)

Basic model training prices for EYFS training

- 1 training day - £130 per delegate
- Classroom based mentoring sessions - £250 per morning / £400 per day (we recommend these if you are new to the approach – for more information just e-mail deeplearningtsa@gmail.com)

Basic model training prices for TA training

- 1 training day - £75 per delegate

Basic model training prices for advanced courses

- Developing communication, collaboration and questioning in the classroom - £150 per delegate
- Developing arithmetic and fluency - £150 per delegate
- Teaching problem solving and using the bar model - £150 per delegate

Basic plus follow-up prices

This pricing package is for schools wishing to send teachers on the Deep Learning TSA Maths core training. Package prices offer a discount on the daily rate but require schools to have some classroom based mentoring sessions.
